

Award-Winning Design

We think every piece we create is the most important one. And that meticulous attention to quality and craftsmanship has earned the attention of the North Florida International Interior Design Association. They awarded the prestigious **Illuminate Award** to Design Loft Interiors for their interior design for Perce Orthodontics. As the contractor who created all the cabinetry and millwork, it's an honor for us as well. Our company has been proudly making custom cabinetry and millwork in Jacksonville for more than 50 years. What can we make for you?
